

Actual cost of installing solar on home

Overview

The average solar power installation price ranges from \$2.74 to \$3.30 per watt in 2024, with most residential systems costing between \$16,500 and \$30,000 before incentives. After applying the 30% federal tax credit, homeowners typically pay between \$12,600 and \$21,000 for a complete.

The average solar power installation price ranges from \$2.74 to \$3.30 per watt in 2024, with most residential systems costing between \$16,500 and \$30,000 before incentives. After applying the 30% federal tax credit, homeowners typically pay between \$12,600 and \$21,000 for a complete.

A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit. NOTE: Under the “One Big Beautiful Bill Act” signed in July 2025, the federal solar.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

Get solar power system costs based on your location, roof, power usage, and current local offers. Published: August 2025 Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity.

While the national average cost ranges from \$15,000 to \$25,000 for a typical residential system, your actual investment will depend on several key factors that can significantly impact the bottom line. Understanding these costs upfront helps you make an informed decision about going solar.

Since 2010, the cost to install solar panels on a home has fallen by roughly 50%. Costs rose slightly from 2020-2023 largely due to supply chain tangles from the pandemic, and then fell again in 2024. As a general trend, we expect U.S. solar prices to continue falling as local manufacturing plants.

The average cost of installing an average-size home solar system in 2025 is \$29,360 before federal tax credits and incentives. The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost. You can determine whether solar panels are worth it for. How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a solar panel upgrade cost?

Depending on the project, an electrical panel upgrade for solar could cost between \$2,000 and \$3,000. If your solar system uses a string inverter, it may need to be replaced. String inverters generally last between 10 and 12 years, while solar panels last for 25 years or more. Getting a new string inverter could cost about \$1,500.

How much does solar cost per watt?

For reference, the national average cost of solar panels is \$3.03 per watt. Solar rebates help make solar more affordable by directly lowering the upfront cost of a solar installation. If you have access to solar rebates, consider yourself lucky! They are few and far between these days.
