The following information provides guidance to applicants and reviewers in determining compliance with residential Solar Ready code. Does the proposed solar zone or zones have the required orientation?

The total solar area may be comprised of one or two zones, both having an orientation between.

Streamline your solar permitting with Solarestique's expert guidance for residential and commercial installations—fast, compliant, efficient, reliable, secure, scalable As renewable energy continues to grow in popularity, Austin, Texas, stands at the forefront of solar energy adoption. For those.

This website provides information on development outside corporate city limits in Travis County. To verify what city and county your property is located in, use the Jurisdiction Web Map. The following information is needed to complete your application: Unsure about required information or.

All solar energy systems that are installed in Austin Energy service area must pass a solar inspection before they can be turned on. This is to ensure the safety of the system. Inspection requests are to be submitted by the solar installation company when the project has been completed. The first.

Austin Build + Connect (AB+C) is the City's online portal that allows registered users to apply for some permits, schedule inspections, pay fees, upload project attachments, and more. The AB+C Manual offers guidance on how to register, apply for permits, pay fees, schedule inspections, and more. Do I need an auxiliary power electrical permit in Austin?

ALL Solar Distributed Generation (DG) Systems, Energy Storage -Systems (ESS), and/or Interconnected Spinning Generators in Austin Energy (AE) territory will require an Auxiliary Power Electrical Permit (EP). For AE Customers & Contractors, the Austin Build + Connect (Ab+c) portal is available to view and apply for most Auxiliary EPs.

Do I qualify for a solar PV rebate from Austin Energy?

A contract with a renewable energy installation contractor or a letter of intent for the purpose of applying for a solar PV rebate from Austin energy should be provided to qualify for this exception.

Do I need a building permit to install solar shingles?

Ground-Mount and/or Building integrated Photovoltaic systems (Solar-shingles) will have additional interconnection requirements (example: engineer-stamped plan sets and corresponding Building Permits), however they will need Auxiliary Power Electrical Permits to inspect the distributed generation and impact to the Austin Energy grid.

How do I design a PV system in Texas?

The local government should determine appropriate level of professional design requirements (e.g. preparation by a master electrician licensed by TDLR; designed and sealed by an engineer, if required by the Texas Engineering Practice Act; or PV equipment manufacturer's engineered line diagram). A proper line diagram should include:

Do I need an auxiliary power permit?

Residential Auxiliary Power Permit: required for any/all distributed generation interconnected to the Austin Energy grid (including solar, wind, battery storage, or grid-tied spinning generators); non-spinning generators require an Upgrade Electrical Permit and are inspected under a separate process as the Auxiliary Power EPs.

Where can AE customers & contractors apply for electrical permits?

For AE Customers & Contractors, the Austin Build + Connect (Ab+c) portal is available to view and apply for most Auxiliary EPs. Log-in & apply for electrical permits online here:
