

# Best prices for solar panels

## Overview

---

How much do Cheap solar panels cost?

The cost of cheap solar panels can range from \$2.40 to \$3.74 per watt. Factors such as equipment quality and system size can affect the price of solar panels. MarketWatch Guides may receive compensation from companies that appear on this page.

What are the best Cheap solar panels for residential use?

SunPower is consistently one of our top picks for solar companies overall, and we found the Maxeon X-Series to be one of the best cheap panels for residential use. SunPower guarantees its X-Series panels won't lose more than 8% of their power production over 25 years, and its 25-year warranty covers panel equipment and power.

Are cheap solar panels a good investment?

Installing solar panels on your home is a considerable investment, but you can cut costs by finding an inexpensive installer and selecting cheap solar panels. Silfab, Panasonic and Q Cells are three of our top-rated cheap solar panels for 2024.

Who makes Cheap solar panels?

Silfab is a prevalent manufacturer in America, and as far as cheap solar panels go, it has one of the most appealing warranty packages to provide you with ultimate peace of mind.

What should you look for when buying cheap solar panels?

Here are the four main things to look for when shopping for cheap solar panels: Cost per watt: It's easy to get distracted by the total price of a solar system, but the number you should focus on is the cost per watt.

Which solar panel should I buy?

Eagle Continental: This panel is my recommendation for the most affordable solar panel for homeowners on a budget. Its 19.8% efficiency rating is good, but not great, but its cost per watt, coming in at \$2.25, is hard to beat. Eagle G4: The Eagle G4 is a big step up from the Continental.
