

# **Best solar battery charger for cars**

## Overview

---

What is a portable solar car battery charger?

A portable solar car battery charger uses solar energy as its power source. It is a device that converts solar energy into electricity to charge car batteries. There are many advantages of solar power over conventional power sources like fuel because solar energy is clean. This means that it does not pollute the environment. What's more, solar energy is free once the installation costs have been met.

What are the two main types of solar car chargers?

There are usually two main types of solar car chargers on the market: the first type has a regulator which controls the charge that goes into the battery, preventing overcharging. The advantage of a regulated solar charger is that it prevents overcharging of the battery.

Which solar charger should I buy?

The PV Logic is easy to use and store and performed well at a reasonable price. For use outside the car, the Photonic Universe 10W would be our choice, with the Topsolar panel close behind. Solar chargers are incredibly useful but should the worst happen then you will need a jump starter pack.

Should you use solar car battery chargers?

The sun is a near-unlimited source of free electricity, which makes the idea of using solar car battery chargers so tempting. If you need to charge your car's battery but don't want to plug in a traditional car battery charger, one of these clever solar panels on your dashboard can supplement battery life, preventing a flat battery.

What size solar panel do I need for a car charger?

For a car charger, a 5W solar panel can be sufficient for smaller vehicles. However, tractors or boats might need a 20W solar charger. It's also essential

to consider the battery voltage. Solar charger brands provide information about the battery voltage supported by their 5W or 20W solar panels.

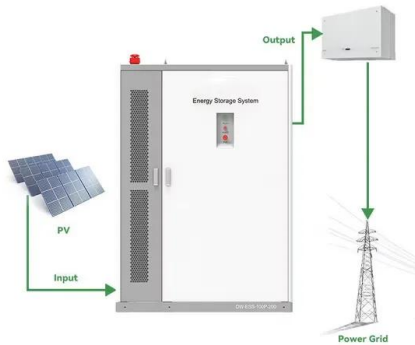

What is the difference between a solar car battery charger & regular Charger?

Besides the obvious difference of the power source, the main difference between a solar car battery charger and a regular charger are that standard chargers are more commonly used to fully charge a dead battery.
