How did ConsumerAffairs choose the best solar energy companies?

The ConsumerAffairs Research Team used a research-backed, data-driven approach informed by our expert editors to choose the best solar energy companies. We considered thousands of verified reviews, equipment options, payment options, system warranties and production guarantees.

What is solarreviews?

SolarReviews has both an extensive collection of unbiased consumer reviews of U.S. solar companies and an expert ranking system to help you identify the best solar panel installation companies in your area. Since 2013, our in-house solar experts and engineers have built one of the most accurate solar calculators available.

What makes a good solar company?

The best solar companies are often associated with the North American Board of Certified Energy Practitioners (NABCEP) or are certified by the Solar Rating & Certification Corporation (SRCC). 4. Ask about efficiency. Some solar panels work better than others. Higher-efficiency solar panels cost more but can make more power in less space.

How do I find the best solar company?

To help calculate the best solar company ranking, the Forbes Home editorial team analyzed 24 solar companies, with each company's star rating determined by evaluating a variety of metrics, including years in business, panel variety offered, the results of our NPS survey and more.

What should I look for when choosing a solar company?

**Warranties:** A reputable solar installer should offer a 25-year equipment warranty and a 10-year workmanship warranty. High-quality companies may also include a power production guarantee for your system output and a roof

protection warranty. What factors should homeowners consider when choosing a solar company?

.

How do I choose a solar installation company?

Research solar installation companies and get multiple quotes: This process can help you get a sense for each company's options and reputation and general expectations for how much power a solar installation can produce on your home. We suggest vetting at least three solar companies, depending on the availability in your area.
