

Best ways to clean solar panels

Overview

How do you clean a solar panel?

A mixture of water and vinegar can be a natural, cost-effective cleaner. Alternatively, opt for solar panel cleaning soap that's eco-friendly and safe for the environment. These systems ensure water is free of minerals, preventing streaks and deposits. They're particularly useful for large-scale cleaning projects.

Do solar panels need cleaning?

There are some instances where solar panels might need cleaning, but most of the evidence says solar panels are self-sufficient and low-maintenance. We'll get to the best way to clean your solar panels in a minute.

Do you need a professional solar panel cleaning tool?

That's why professional or DIY solar panel cleaning tools are essential. Improper cleaning can sometimes dislodge or misalign panels, especially in solar panel cleaning on pitched roofs. This misalignment reduces efficiency and can lead to costly repairs. Always ensure panels are firmly secured after cleaning.

How do you clean solar panels in winter?

Use a soft snow rake or a brush designed for solar panel cleaning to gently remove snow. Avoid using sharp tools or applying excessive pressure, as this can damage the panels. Cleaning snow is especially important in winter to restore efficiency quickly.

How much does solar panel cleaning cost?

A professional solar panel cleaning company may not necessarily do a significantly better job than you can, but they're likely better equipped to clean and maintain rooftop units safely and already have all of the necessary equipment. Plus, professional solar panel cleaning will usually only cost you

around \$150-\$300, or \$15-\$30 per panel.

What should I do if my solar panels get dirty?

Shut off your solar panel system – this ensures your safety and that your equipment won't get damaged. Use a soft brush to clean the surface of your dirty solar panels to remove debris like dirt and dust. Never use a rough or coarse brush as it could damage your panels.
