Warranty: 10 years

Overview

How much do solar panels cost in Maine?

The average Maine homeowner needs a 10.15 kW solar panel system to cover their electricity needs, which comes out to \$33,080 before incentives. Prices range from \$28,118 to \$38,042, but after the federal tax credit, that drops by 30%. While this is a lot of money, adding solar panels will help you avoid paying Maine's high electricity rates.

Are solar panels a good idea in Maine?

Our climate may be cold, but cold is actually good for solar panels. In the brisk but sunny fall and spring, solar panels in Maine will produce a disproportionately high amount of power, helping to make up for any power loss due to solar panels covered in snow.

Is Maine solar solutions a good company?

Maine Solar Solutions has an excellent staff of professionals with North American Board of Energy Practitioner (NABCEP) certified installers and Master Electrician. I would recommend Maine Solar Solutions for commercial and residential PV system design and installation.

What incentives are available to go solar in Maine?

Recent pushes to develop Maine's solar industry and expand installations resulted in numerous incentive programs that make going solar in Maine more cost efficient and beneficial than ever before! In addition to net-metering, homeowners and businesses can take advantage of the federal solar tax credit, which is currently available at 30%.

How long does a solar system last in Maine?

That's why over 7,800 Maine homeowners have used EnergySage to receive and compare quotes for solar installations. You can expect to earn back your initial solar investment through electricity savings in about 12.5 years, while

most systems last at least 25 years. You'll often see this number referenced as your solar payback period.
