

California solar tax breaks

Overview

While there is no California solar tax credit at the state level, CA residents can take advantage of the ongoing federal solar tax credit on their income taxes. This is officially called the Investment Tax Credit (ITC), and it's worth 30% of the total installation cost.

While there is no California solar tax credit at the state level, CA residents can take advantage of the ongoing federal solar tax credit on their income taxes. This is officially called the Investment Tax Credit (ITC), and it's worth 30% of the total installation cost.

On the bright side, compared with those in other states, California residents have more access to tax breaks, rebates and loan programs to help cover the upfront costs of installing solar panels. We're here to give you a current breakdown of all the best California solar incentives in 2025. NOTE:.

California solar incentives can reduce the cost of the average solar panel installation by an estimated \$6,780. A solar installation with an average-sized backup battery can earn an additional \$6,700 (or more) in tax credits and rebates. California's solar incentives can reduce solar panel payback.

California homeowners can cut solar installation costs by up to 30% with federal tax credits and state rebates. Here's what you need to know: Federal Tax Credit (ITC): Claim 30% of your solar system costs, including panels, batteries (3 kWh+), and installation, through 2032. Example: A \$29,360.

As 2025 begins, California continues to lead the way in green energy initiatives, offering some of the most attractive solar tax incentives in the country! These incentives reflect the state's commitment to renewable energy and present a golden opportunity for homeowners and businesses alike to.
