

# **Cheapest container solar kit supplier in France**

## Overview

---

### Can you sell surplus solar power in France?

You can sell surplus solar power produced by a DIY kit if it has been checked by an RGE accredited professional and connected to the grid by Enedis, which manages France's electrical supply. Read more: [France solar panels: How do I connect them to grid and sell my energy?](#)

.

### Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

### How much do DIY solar panels cost?

DIY solar panel kits are around the price of purchasing the panels through an official company and having one of their electricians install them. The average price for a DIY kit including 16 panels is around €6,250.

### How much does a DIY roof kit cost in France?

The average price for a DIY kit including 16 panels is around €6,250. These are generally capable of producing 64,000Wc (watt crête, or 6.4 kWc), which is about 1.5x the power consumption of an average household in France. Most of these kits do not require a DP unless they are to be fitted on a roof over 1.8m high.
