A side-by-side comparison of the key company details and customer reviews for SunPower and SolarCity. See who our experts recommend.

A side-by-side comparison of the key company details and customer reviews for SunPower and SolarCity. See who our experts recommend.

SunPower holds 750 solar technology patents and makes the highest-efficiency solar panels currently available on the market. According to testing, SunPower's panels deliver 44 percent more energy per watt than competitive products and can maintain their production better than other panels in.

SunPower launched in 1985 in Silicon Valley, but its real history dates back to the 1970s when co-founder Dr. Richard Swanson began pondering ways to make solar cells – like those used to power satellites – more cost effective for residential and business use. In the 1990s, SunPower solar.

I argued about the efficiency of the SunPower panels and the SolarCity sales rep relied heavily on the insurance the system carries versus SunPower. I'm not sold on the insurance factor, but this MyPower plan does interest me. Any thoughts?

Remember, cost efficiency is what saves you money, not.

With multiple financing options and the cost of utilizing solar energy continuing to decline, your choices for an affordable switch-over to solar are better than ever. We have reviewed the big players in this space and provided a quick and easy way to get free quotes from multiple companies to help.

Monthly price is about \$10 higher for SunPower, seems like I am paying a little more for a better panel and less panels on my roof. Am I missing something?

Both companies trash each other. SolarCity says that there are too many loopholes in the SunPower lease, but yes their panels are more.
