Our off-grid solar power packages below include everything you need to generate, store, and use power off-grid - solar panels, batteries, a charge controller, an inverter, and all the bits in between. You'll also get full instructions and ongoing support from our team.

How do I design an off-grid Solar System?

Designing an off-grid solar system can be complex. There are three factors to consider when sizing for off-grid solar: The most common off-grid system configurations range from 5kW to 21kW. However, energy usage varies for every household, so the best approach is to design a custom off-grid solar kit based on your specific energy usage patterns.

Can a solar kit support a complete off grid Solar System?
