Container pv kit EPC service price in Finland

Overview

What is an EPC contract?

The basic idea behind the EPC contract is that the contractor assumes far-reaching, full responsibility for the success of the construction project. A lump sum price is usually agreed on for completion in this process. The contractor's project risk depends on the extent of the contractor's responsibility.

What is an EPC project?

EPC projects that are also known as 'turnkey' and as the contractor assumes responsibility for engineering services, procurement of materials, hiring of teams and materials, and execution of the work, among other tasks, to deliver the project ready to be operated by the client by a given deadline and with a number of guarantees.

What is an EPCF project?

EPCF projects are those in which the client entrusts Symtech Solar and its Partners as contractors with the complete execution of the work, from engineering design, procurement, construction, testing and commissioning and even the finance.

How do I draft and negotiate an EPC contract?

Drafting and negotiating an EPC contract primarily follows the needs of the project. Universal rules cannot generally be established. But of course, conventions and customs in the target market - Finland in this case - are a factor. The following article highlights a few key points.
