

# **Container pv kit EPC service price in Netherlands**

**Nominal Capacity**

**280Ah**

**Nominal Energy**

**50kW/100kWh**

**IP Grade**

**IP54**

## Overview

---

What does EPC stand for?

You are here: Home » Locations » Amsterdam, Netherlands » Amsterdam, Netherlands Energy Performance Certificate (EPC) In Amsterdam, Netherlands, our collaborative partners bring a wealth of expertise to assess and officially certify structures with an Energy Performance Certificate (EPC).

Are EPCs required for all buildings?

**Mandatory for All Buildings:** Unlike some other EU countries where EPCs are only required for specific types of buildings (e.g., newly constructed or renovated), Amsterdam mandates EPCs for all buildings, residential and non-residential, when they are put up for sale or rent.

Where is KPV based?

KPV's project engineering group, headquartered in Austria, has already successfully put a wide range of installations into operation in various European countries. Outstanding returns are engineered in collaboration with close partners KIOTO and GREENoneTEC already at the very moment of module manufacturing.

Why is a valid EPC important?

Throughout Europe, possessing a valid EPC is imperative for properties in the leasing or selling process, acting as a pivotal gauge of a building's energy efficiency. Specifically in Amsterdam, there are Minimum Energy Efficiency Standards (MEES) that must be met for the leasing or selling of a building or unit.

What makes KPV high performance modules so special?

KPV modules withstand highest snow loads (5400 Pa) and are extremely hail resistant (twice the IEC requirements!) All main components of these KPV high performance modules are of European origin, thus guaranteeing superior

product quality for an extremely long life time.
