

Container pv kit quotation in Australia 2025

Overview

What are shipping container solar panels?

Our shipping container solar panels are designed to withstand the rigors of outdoor use and provide long-lasting performance. We utilise high-quality solar panels that are built to withstand harsh weather conditions, including extreme temperatures, rain, and wind.

How many solar panels can be installed in a shipping container?

These are configured as 3 phase systems inside an air-conditioned and insulated shipping container. Containerised systems are manufactured and tested at RPC to reduce installation time and cost. You would need a very large roof or ground mount frames to accommodate up to 288 solar panels.

What does a modbox solar container include?

A typical ModBox solar container includes battery storage, inverter setup, internal racking, cabling, ventilation, and secure access. We can also include external solar panel mounting or integrate with your existing array. Can I use a solar container to power other ModBox units?

Absolutely.

What is a containerised Solar System?

Containerised systems are manufactured and tested at RPC to reduce installation time and cost. You would need a very large roof or ground mount frames to accommodate up to 288 solar panels. Contact Us A 48V stand alone system with a 6 x 8000W battery inverters. Designed for an overall consumption of about 120 kWh per day *.
