

Container solar kit EPC service price in New Zealand

Overview

How are solar projects procured in New Zealand?

Solar projects are typically procured on the basis of an EPC contracting model (in large part due to the “bankability” of this model). However, EPC contracts are not common in the domestic construction industry – there is no market ‘standard’ form in New Zealand.

Are solar EPC contracts common in New Zealand?

However, EPC contracts are not common in the domestic construction industry – there is no market ‘standard’ form in New Zealand. Consequently, in New Zealand the solar EPC contracts are either based on the FIDIC suite, or bespoke agreements used by private developers in other jurisdictions.

Where is solar EPC based?

Headquartered in Auckland, we operate across New Zealand. Latest news and insights. With 13 years of international experience in the solar industry, we are quickly becoming the leading solar EPC company in New Zealand.

Should a business purchase a solar system?

Depending on your business’s long-term energy strategy, financial goals and risk tolerance, you may prefer to enter a power purchase agreement (PPA) with a solar energy supplier, rather than purchasing a solar system outright. A PPA is effectively a long-term contract to purchase electricity.
