

Container solar kit quotation in Turkey 2026

Overview

How many solar panels will Turkey install by 2026?

The Turkish Photovoltaic Association's PV roadmap report released in 2019 predicted that the country will install a cumulative 38GW of PV systems by 2030. In another study released in May 2018, Istanbul-based Shura Energy Transition Center predicted that the cumulative installation of PV systems in Turkey will exceed 20GW by 2026.

What happens if Turkish solar modules import over \$60/kg?

If Turkish module manufacturers decide to import solar cells above the \$60/kg limit, they will be hit with import duties. There are currently two manufacturers in Turkey that also produce or plan to produce solar cells – Kalyon Solar Technologies in Ankara and Smart Solar Technologies in Izmir.

Does Turkey have a minimum import price for solar cells?

The Turkish government has set a minimum import price of \$60/kg, so solar cell imports exceeding this threshold will be subject to import duties. The measure is designed to protect domestic cell manufacturers. A 4.2 MW rooftop PV system installed by IBC Solar in Turkey.

Does Turkey impose import duties on solar cells?

Emiliano joined pv magazine in March 2017. He has been reporting on solar and renewable energy since 2009. The Turkish government has set a minimum import price of \$60/kg, so solar cell imports exceeding this threshold will be subject to import duties. The measure is designed to protect domestic cell manufacturers.
