Container solar kit shipping and installation cost in Vietnam

Overview

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500 to \$8,000.

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500 to \$8,000.

Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more.

In 2025, the cost of solar energy installation in Vietnam varies widely by capacity and installation conditions, from homes to large enterprises. The installation cost of home solar systems in Vietnam depends on the system capacity, ranging from 35 to 150 million VND based on kWh. A 3 kWp system.

The prices of solar panels in Vietnam are subject to fluctuations based on different time periods and government regulations regarding the installation and deployment of solar power systems. At any given time, solar panels may cost anywhere from a few hundred thousand to several million Vietnamese.

We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Learn more about the product and inquire below. Who is Stealth Power?
