All solar.

The Bahamas, with an average of 350 sunny days per year, offers a prime opportunity for solar energy. For entrepreneurs and investors, however, harnessing this power means facing a significant logistical challenge: importing the necessary components. The journey from a manufacturer to a project.

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500 to \$8,000. But that's just.
