

Container solar solutions EPC service price in Malaysia

Overview

How much does a solar panel cost in Malaysia?

Whether you're installing solar panels for bill reduction or you're participating in TNB's sell back scheme, you'll need to know what the solar panel price in Malaysia is like. On average, a 4kWp solar panel installation will cost you around RM 55.000.

What does an EPCC do?

As an EPCC (or EPC) specialist, it's our job to deliver outstanding engineering work and safety performance at every level to ensure you achieve your solar ambitions. Because sustainability is a continuous journey and we're with you every step of the way. EPCC = Engineering, procurement, construction and commissioning. Solar PV engineering.

Why should you choose a solar company in Malaysia?

Solar panels, which are much larger in size, can be cascaded to produce a larger amount of electricity. The panels can channel the electricity to power up larger appliances like air conditioners and water heaters. With many options available, choosing a solar company in Malaysia isn't easy.

Is solar a good alternative to conventional electricity production in Malaysia?

Solar in Malaysia turns out to be a great alternative to conventional electricity production. With 12 hours of daily sunlight exposure throughout the year, it's as good as any exposure you can get elsewhere on earth. Malaysia is also supportive of the move towards green energy.

How much does a 4kWp solar panel installation cost?

On average, a 4kWp solar panel installation will cost you around RM 55.000. Factors like the type of solar panels, size and services involved will influence the final amount. Before you commit to solar panel installation, it's wise to seek consultation with our company.
