What is solar EPC's scalable lithium-ion containerized energy storage system?

Solar EPC's scalable Lithium-Ion Containerized energy storage system ideal for off-grid and renewable energy storage provides invaluable flexibility.

What is a container energy storage system?

A Container Energy Storage System (ESS) is a modular, scalable solution for storing electrical energy. It typically consists of batteries housed in a shipping container, which makes it easy to transport and deploy. These systems can be used for various applications such as grid support, renewable energy integration, and backup power.

Do ESS containers come with air-cooling and liquid- cooling?

Our ESS containers come with both air-cooling and liquid-cooling options. Air-cooling systems are typically used for smaller capacities, while liquid-cooling systems are suitable for higher capacities due to their superior thermal management. Effective cooling is crucial for maintaining optimal battery performance and longevity.

What is an EPC project?

EPC projects that are also known as 'turnkey' and as the contractor assumes responsibility for engineering services, procurement of materials, hiring of teams and materials, and execution of the work, among other tasks, to deliver the project ready to be operated by the client by a given deadline and with a

number of guarantees.
