Clean Horizon releases its 2025 energy storage price forecast for Italy, covering MACSE auction details, business models and revenue streams.

Clean Horizon has released its latest Energy Storage Price Forecast for Italy, providing valuable insights into one of Europe's most dynamic emerging markets for battery storage. Italy is accelerating its energy transition with ambitious targets and a robust policy framework, aiming to deploy 71.5.

A panel titled "Interactive Deep Dive Italy: Choosing the best path for BESS ROI in Italy – MACSE, capacity market, or merchant strategies?"

" at the Battery Business & Development Forum 2025 highlighted that the Italian battery storage market is very different from other European markets. "The MACSE.

Italy is currently among Europe's hottest battery storage markets thanks to its MACSE auction scheme, an established capacity market and the first attempts to go merchant by project developers. This market, however, is becoming increasingly competitive and both micro and macro challenges are.

The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility-scale battery segments, offering deep insights into Europe's energy storage landscape. With record growth in 2024 and new projections through 2029, the study highlights key market drivers.

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia. This move underscores the country's growing commitment to grid resilience, energy.

The first of Italy's new energy storage capacity procurement auctions (MACSE) will take place on September 30, 2025, Terna's president for grid development

strategies, Francesco Del Pizzo, has confirmed. After months of speculation and a postponement from the initially planned July date, it's clear.
