

Containerized renewable power quotation in Canada 2026

Overview

Could a net-zero energy future save Canadians \$15 billion?

A recent analysis of energy affordability – conducted on behalf of the Canada Electricity Advisory Council – confirms the potential savings. It found that Canadians would stand to reduce their total energy related costs by as much as \$15 billion through the shift to a net-zero future. What's more, we overlook this potential at our own peril.

How much energy will Québec generate by 2035?

The Québec Government repeatedly stated its goal for the Province to generate more than 60 TWh of energy by 2035 in order to meet the growing demand for electricity in the context of electrification, energy transition and decarbonization of the Québec economy.

How will Canada help modernize the electricity system?

The Government of Canada will help modernize the electricity system by: Supporting strategic electricity transmission and major clean electricity projects. This includes encouraging transmission projects to improve grid connectivity and resilience, such as the Salisbury-Onslow Reliability Tie between Nova Scotia and New Brunswick.

Will the IESO procure new renewable electricity in 2024?

In their recent Resource Adequacy Update to Ontario's Minister of Energy, the IESO announced their intention to procure a significant amount of new renewable electricity through additional procurement initiatives going into 2024.

Is there momentum for renewables in 2024?

Nevertheless, there is still some momentum for renewables going forward, particularly in the secondary market. M&A deals in renewables performed well throughout 2024, and at the start of 2025, Caisse acquired Innergex

Renewable Energy Inc. in a deal worth approximately \$10B.

Will Trans Mountain pipeline increase takeaway capacity in 2024?

The government-owned Trans Mountain Pipeline expansion will boost takeaway capacity significantly once it enters service likely in 2024. The 590,000-barrel-per-day expansion will fetch tidewater prices and reduce the discounts on Canadian benchmarks.
