

Containerized renewable power quotation in Portugal 2026

Overview

How can Portugal achieve 80% renewable electricity by 2026 & 85% by 2030?

This initiative supports Portugal's goal of 80% renewable electricity by 2026 and 85% by 2030. In 2024, renewable energy contributed 71% to Portugal's electricity, marking a record 36.7 TWh. The energy storage projects will help stabilize the electricity grid and contribute to a greener, more sustainable energy transition.

How many projects were selected in Portugal's 2025 energy storage procurement?

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding.

Why are renewables growing in Portugal?

Attaurrahman Ojindaram Saibasan, Power Analyst at GlobalData, commented: "Renewables growth in Portugal is attributed to strong policy implementation and incentives offered by the government, such as the introduction of feed-in tariffs (FiT), which was pivotal in the growth of renewable power plants in the initial phase.

How will India achieve 80% of its electricity generation by 2026?

The government set a target to achieve 80% of its electricity generation from renewables by 2026, four years earlier than previously planned. To achieve the new target, the country needs to invest heavily in energy storage solutions and upgrading its national grid, said GlobalData.
