Containerized solar power plant quotation in Croatia 2025

Overview

Croatia plans to launch two solar tenders in 2025, according to the country's indicative annual publication plan for the year, which is now available on the Ministry of Environmental.

Croatia plans to launch two solar tenders in 2025, according to the country's indicative annual publication plan for the year, which is now available on the Ministry of Environmental.

Croatia plans to allocate €25 million (\$25.7 million) for public sector solar plants and heat pumps, alongside a €10 million residential solar tender, as part of a €652 million renewable energy and decarbonization package. Croatia plans to launch two solar tenders in 2025, according to the.

Croatia is set to allocate €25 million for solar plants and heat pumps in the public sector and will also issue a €10 million residential solar tender. This is part of a larger €652 million package aimed at renewable energy and decarbonisation. According to the country's indicative annual.

The Croatian government is harnessing the power of solar energy, planning to allocate a noteworthy €25 million specifically for the development of solar plants and heat pumps across the public sector. This funding is indicative of Croatia's commitment to an eco-friendly future. Complementing this.

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. This expansion is part of the country's broader commitment to renewable energy, aligning with EU targets to boost the share of renewables in electricity generation.

At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower According to U.S. consulting firm BCG, Croatia has significant untapped potential for solar energy usage.

22 August 2025 - No environmental impact assessment or assessment of acceptability for the network of protected areas is required for the 65.7 MW

Deanovec solar power project in Croatia. 20 August 2025 - ENNA Geo completed additional production testing of the well for its planned geothermal power. How much does a solar tender cost in Croatia?

The first tender, with a budget of €10 million, will be aimed at installing residential solar arrays in the second quarter of 2025 and will cover up to 50% of the investment costs. Additionally, the Croatian authorities will announce a €25 million call to co-finance solar plants and heat pumps for the public sector in the second quarter.

How much does solar energy cost in Croatia?

In a related initiative, the Croatian energy market operator HROTE hosted a renewables tender in June 2024 to secure market premium support for 607 MW of renewable energy, which included 450 MW of solar power. The tender ultimately allocated 413.5 MW of solar energy at an average price of \$0.065 per kWh.

How many public calls will Croatia make in 2025?

Another call for end users is expected in the first half of the year. Croatia's Environment Protection and Energy Efficiency Fund (FZOEU) will distribute €125 million across nine public calls in 2025. The Ministry of Environmental Protection and Green Transition (MZOZT) will administer 23 public calls this year, amounting to €526.8 million.
