Overview

How much does a solar panel cost?

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar panel also depends on how you buy it.

How much do solar panels cost for a 2500 sq ft house?

How much do solar panels cost for a 2500 sq. ft house?

For a 2,500 sq. ft home, expect to pay \$31,000–\$33,000 (\$21,700–\$23,100 after tax credit) for an 8–9kW system. At this size, spending more on efficient monocrystalline panels often makes sense because you can generate more power with fewer panels.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

Is home solar more affordable than paying for utility electricity?

Although home solar is already more affordable than paying for utility electricity, there are a few ways to reduce the cost of your system and

maximize your energy cost savings. First, there are solar incentives offered by federal, state, and local governments, in addition to utility providers.

How much does solar cost per watt?

The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range. Claiming incentives like tax credits and rebates can bring the PPW even lower. However, the following factors may push your solar price per watt into the \$4 to \$5 range.
