

# **Cost of a solar system for a house**

## Overview

---

How much does a home solar system cost?

Home solar systems typically range from \$6 to \$12 per square foot of living space. The actual cost may vary based on the size and electricity consumption. These estimates are assuming the homeowner claims the 30% federal tax credit \* for the solar system.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a 1500 square foot Solar System cost?

The average solar system costs around \$27,500 before incentives, and around \$19,250 after the 30% tax credit for a 1,500 square foot house, according to a data analysis by Solar.com. That boils down to a rate of around \$12.80 per square foot of living space. Related reading: [How Many Solar Panels Do I Need for a 1,500 Square Foot Home?](#)

.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000

going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
