

# **Cost of residential solar panels**

## Overview

---

It costs around \$30,000 to install solar panels. That's a big number, but incentives usually lower it significantly. The average U.S. solar shopper needs about 11 kilowatts (kW) of home solar to cover their electricity usage. Based on thousands of quotes in the EnergySage Marketplace, you'll pay.

It costs around \$30,000 to install solar panels. That's a big number, but incentives usually lower it significantly. The average U.S. solar shopper needs about 11 kilowatts (kW) of home solar to cover their electricity usage. Based on thousands of quotes in the EnergySage Marketplace, you'll pay.

The cost of solar panels depends mainly on system size, equipment quality, installation complexity, location and available incentives. Financing solar panels might be a good idea if your loan payments are less than your power bill. A small residential solar panel system costs around \$14,210 before.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor. Clicking "Get Your Estimate" submits your data to All Star Pros, which will process your data in accordance with the All Star Pros Privacy Policy. Understanding solar panel costs is a key step in.

The average cost of installing a 7.6kW solar system on your roof is \$23,100 before any incentives or tax credits, and most homeowners pay somewhere between \$19,100 and \$23,800. Prices vary widely based on factors like the size of the system you need, the quality of the equipment you choose, how you.

Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans. Our team of solar experts.

Solar panels cost between \$15,000 and \$22,500 on average. Get custom quotes from the top installers in your area using the form below. Tori Addison is an editor who has worked in the digital marketing industry for over five years. Her experience includes communications and marketing work in the. How much does it cost to install solar panels?

It costs around \$28,000 to install solar panels. That's a big number, but incentives usually lower it significantly. Why trust EnergySage?

The average U.S. solar shopper needs about 11 kilowatts (kW) of home solar to cover their electricity usage.

Are solar panels worth it?

Solar panels are worth it for most homeowners, especially those dealing with high electricity rates. Solar panels can reduce or eliminate your electric bill for 25+ years. With a 6-to-10-year average payback period, this means 15+ years of free electricity—a reduced carbon footprint and significant long-term savings.

How much do solar panels cost per watt?

The average cost per watt for solar panels in the U.S. is \$2.84 for residential systems. High-efficiency monocrystalline panels tend to be at the higher end of the price range, but they generate more power with fewer panels—ideal if you have limited roof space.

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system – and neither is living space, for that matter.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

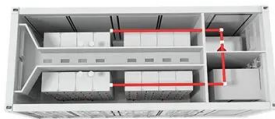

Do solar panels cost a lot?

However, solar costs can vary widely depending on where you live. For instance, states like California and New York often have higher prices due to labor rates and stricter building codes, while states such as Texas and Florida tend to offer more affordable installation options.
