Cost of solar panel system for home

Overview

What is the average cost of home solar panel systems?

The average cost to install solar panels is from $10,626 to $26,460 (after tax credit) for a 6kW to 12kW system to power an entire house. The average solar panel payback period is 7 to 12 years, and solar energy saves $600 to $2,000 per year on electricity costs.

Are there any tax credits available to reduce the cost of home solar panel systems?

State and local incentives: The 26% federal solar tax credit, also called the Investment Tax Credit or ITC, greatly reduces solar installation prices, but there is also a variety of state and local solar rebates and tax incentives that can help lower costs. You can read more about what incentives you qualify for in our State Solar Incentive Guide.

Are there any tax incentives for installing solar panels in a home?

Installing solar panels earns you a federal solar tax credit. That means you'll get credit for your income taxes, which lowers your tax bill. You can qualify for the Investment Tax Credit (ITC) as long as your solar system is new or being used for the first time between January 1, 2006, and December 31, 2023.

How much does a 6 kW solar panel installation cost?

Solar panels cost $1.77 to $2.20 per watt and a 6 kW solar panel installation for the average home costs from $10,626 to $13,230 after the 30% federal solar tax credit. Solar energy costs $0.08 to $0.10 per kWh to produce on average, depending on your location.
