Panel production costs in the world's largest producer of solar energy have declined a whopping 42% from year ago, dropping as low as 15 cents per watt. Wind turbines and solar panels are seen at a wind and solar power plant run by State Power Investment Corporation (SPIC) in Zhangjiakou, Hebei.

According to [jbms360.com](https://www.jbms360.com), the price of solar panels in China ranges from approximately \$0.07 to \$0.14 per watt, depending on the brand and specifications. This competitive pricing is a result of China's extensive manufacturing capabilities and government support for renewable energy initiatives. How much does a solar panel cost in China?

That's more than 60% below the US price of 40 cents per watt, according to

the report. A year ago, Chinese panels cost 26 cents per watt. China's price plunge gives manufacturers there an enormous advantage over rivals in places like the United States and Europe.

Why are Chinese solar panels so expensive?

A year ago, Chinese panels cost 26 cents per watt. China's price plunge gives manufacturers there an enormous advantage over rivals in places like the United States and Europe. US producers have been increasingly concerned by the wave of new factories in China, which could make their own uneconomical.

How much do solar panels cost?

Panel production costs in the world's largest producer of solar energy have declined a whopping 42% from year ago, dropping as low as 15 cents per watt, according to a report by energy consultant Wood Mackenzie. That's more than 60% below the US price of 40 cents per watt, according to the report. A year ago, Chinese panels cost 26 cents per watt.

Are Chinese solar panels cheaper than US solar panels?

Yet, while Chinese solar panels are 20% cheaper than their American equivalents, this number is not the difference between the success and failure of the U.S. solar energy industry. High interest rates and the permitting quagmire must also be addressed. Ending China's dominant position in the global solar market is not possible.

Why did solar panel prices drop in China in December?

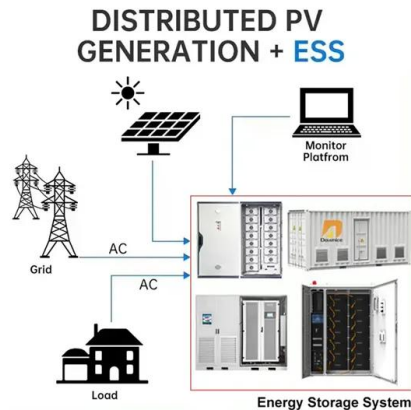

Module prices in China slid to a record low in December as manufacturers in the country rushed to clear their inventories amid a seasonal lull, PV magazine reported last week. Solar panel demand tends to drop off during the winter months in the country.

Should the US loosen restrictions on cheap Chinese solar panels?

Even with the support of subsidies and tariffs, U.S. solar manufacturers struggled to compete with the flood of cheap solar panels pouring out of China into the global market. While some argue that the U.S. should loosen restrictions on cheap Chinese solar panels to accelerate renewable energy deployment, this approach is unsustainable.
