

# **Customized container battery system quotation for Portugal project**

## Overview

---

A 1MWh system: Costs between €695,000 and €850,000. Larger systems, like 5MWh, cost €3.5 million to €4 million, benefiting from economies of scale. Calculating initial costs involves assessing energy capacity, power requirements, and site-specific conditions. What is a lithium battery energy storage container system?

lithium battery energy storage container system mainly used in large-scale commercial and industrial energy storage applications. We offer OEM/ODM solutions with our 15 years in lithium battery industry.

What is a containerized energy storage system?

The Containerized energy storage system refers to large lithium energy storage systems installed in sturdy, portable shipping containers, which usually range from 5ft, 10ft, 20ft, and 40ft, and mainly focus on 50Kwh to 10Mwh.

Why should you choose a lithium-ion battery storage container?

Flexibility and scalability: Compared with traditional energy storage power stations, lithium-ion battery storage containers can be transported by sea and land, no need to be installed in one fixed place and subject to geographical restrictions.

What is a Bess container solution?

Semi-Integrated BESS Container Solution This configuration provides a ready-to-use base while still allowing flexibility for clients to integrate their preferred brands or technologies for PCS, EMS, or other components. It's the perfect balance between off-the-shelf convenience and personalized control. 3. Fully Integrated BESS Container Solution.

What is a container enclosure body with a battery rack?

1. Container Enclosure Body with Battery Rack This is our foundation-level

BESS solution, designed with flexibility in mind. It features a high-quality container enclosure pre-installed with a battery rack, allowing clients to integrate their own battery packs, cooling systems, fire suppression systems, and other components.
