

Customized container pv storage quotation for South Africa project

Overview

What is a backup Solar System in South Africa?

Backup solar system is your best solution against relentless load shedding in South Africa. Solar PV is the perfect way of protecting yourself against high electricity bills. Switch to Solar & save up to 80% of your bills Generate your power and manage your use, even when the grid goes down! Survive during frequent load shedding.

What is a containerised PV plant?

The deployment of containerised PV plants is a fast and convenient method of deploying a new system in remote locations where brick and mortar buildings are not available. These plants can be built and commissioned off site and reduces the time from order placement to energy production significantly.

What are VAC solar containerised solutions?

The VAC Solar containerised solutions include the required high voltage inverters, LiFePO₄ batteries and MCCs (Motor Control Centres) complete with the AC and DC switch gear and protection i.e. circuit breakers, change over switches, fuse protection and SPDs (surge protection devices).

Who is container structures?

South Africa's leading provider of new and used shipping containers with custom conversion services for any business need Since our inception, Container Structures has been driven by a vision to redefine the possibilities of modular infrastructure.

What is a multi-container system?

For larger multi-megawatt plants, a multi-container design approach has also been configured which is able to house multiple inverters, battery banks and the required switch gear. These systems are perfectly suited for many commercial, industrial, agricultural and off-grid village electrification projects.
