

Customized containerized solar power plant quotation for Brazil project

Overview

What is a containerized power module?

Fueled by natural gas, the power module is dedicated to the production of electrical energy. Containerized power module with a power output of 3MW. Plymouth, UK. Flexible generation power plant to balance the local electricity network in an area with growing demand. 2 containerized power modules with a combined power of 5 MW. Yeovil, UK.

Why should you choose a containerized plant?

Its fast assembly time of 2-5 days and serviceable design also allows you to launch and run your project with reduced space, costs, and downtime. In a nutshell, containerized plants bring more efficiency, customization, and less investment risk for your company. Our custom modular design allows us to deliver plants that fit your needs.

Why do you need a custom modular gas plant?

Our custom modular design allows us to deliver plants that fit your needs. Our plants support different electrical outputs, gas applications, noise levels, exhaust levels, and environments. The plants can be designed for different gas applications like Natural Gas, Biogas, Landfill Gas, and Special Gas.
