Read more in this article about the features, packages, prices, and reviews of OpusFlow and other companies offering solar proposal software. The six companies we researched are PV*SOL, EasySolar, SolarGraf, Aurora Plan, 2Solar by Sollit, and OpusFlow, all operating in Europe. Based in: Berlin, Germany.

How do I choose the right solar proposal software?

Selecting the right solar proposal software for your business can be challenging. It needs to be efficient, work well for your processes, and help you create the most suitable quotations for both you and your clients. To help you gain more insight, we've reviewed OpusFlow and five other European companies that offer solar proposal software.

What is opusflow solar proposal software?

It allows you to create detailed quotations quickly, with calculations and visualizations, without taking much time away from your core work. Read more in this article about the features, packages, prices, and reviews of OpusFlow and other companies offering solar proposal software.

Is Germany a leader in solar energy?

Germany is a leader in the solar energy sector, making it crucial for interested parties to understand several key considerations. Firstly, the country has stringent regulations and policies that promote renewable energy, including the Renewable Energy Sources Act (EEG), which supports feed-in tariffs for solar power.

Which solar companies are based in Europe?

The six companies we researched are PV*SOL, EasySolar, SolarGraf, Aurora Plan, 2Solar by Sollit, and OpusFlow, all operating in Europe. Based in: Berlin,

Germany Note: Only features that are relevant to quotation making are mentioned.

What is the difference between solargraf and other packages?

There are no differences in the features offered by SolarGraf packages; all packages come with the same features. Customers can request a free demo to learn more about how the program works. The differences between the packages lie in the number of users.
