

Customized mobile solar station quotation for New Zealand project

Overview

How does solar power work in New Zealand?

Power is generated from solar panels during the day, appliances can freely use this energy. If appliances are turned off, solar power is sent to the grid, and sold to your energy retailer. Common residential grid-connected system sizes installed in New Zealand range between 3kW and 5kW. View grid-connect solar power system prices [here](#).

How much do solar panels cost in NZ?

Solar panels cost very little in NZ and offer a reliable source of power for water pumps, lighting, security cameras and alarms, remote communications, security gates, signage billboards, light houses, and on-site container offices. Wherever you need power, we can design off-grid solar systems perfect for your needs.

Is there a tiny house off grid solar in New Zealand?

The rise of the tiny home movement and tiny house off grid solar in New Zealand is also something we have huge experience with. Good luck on your journey to live free. We are here to help. Watch this video by Roy Maddox, Director and Rhys Coffin, Solar Designer.

Do you provide solar installations in New Zealand?

Yes! We provide solar installations in Auckland, Northland, Waikato, The Bay of Plenty and throughout the rest of New Zealand. With local installers and partners supporting both urban and rural properties.

Can a power station solar power plant save you money?

A POWER STATION solar off the grid power plant can save thousands of dollars in connection fees and ongoing monthly power bills. The solar energy collected from your property is 100% renewable and sustainable. It's good for you and good for the planet. When you go off-grid you're not alone.
