

# **Customized portable solar generator quotation for Tunisia project**

## Overview

---

In the simplest terms, manufacturing is the process of producing actual goods or items/products through the use of raw materials, human labour, use of machinery, tools and other processes such as chemical formulation. This process usually starts with product designing and raw material selection, turning them.

In terms of solar, manufacturing encompasses the fabrication or production of materials across the solar market chain. The most common product being.

Aside from the solar panels, solar companies have many other manufactured products that are required to make solar energy systems work smoothly, like solar.
