

Customized portable solar solution off-grid project cost in Norway

Overview

What is the market for PV in Norway?

The market for PV in Norway is split between of grid-connected systems and PV to off-grid applications . The main driver for the grid-connected segment is high environmental goals set by property developers who want energy efficient buildings or operations to reduce the amount of energy from the grid.

How can I design my own Solar System?

Look up the address for the installation and design your own solar system in our online drawing program. Receive a quote and order the solar system you have designed yourself, from a local company. We have a dealer network throughout Norway that installs solar systems where you live.

How do I order a solar system?

Register and request your local installation supplier, get the supplier's price into your own user account and order your facility online. Clarify the delivery time and assembly time with your electrician. What we can do for you?

Look up the address for the installation and design your own solar system in our online drawing program.

How big is the off-grid market?

The off-grid market is expanded from small systems with 12 V DC battery only to larger hybrid systems with larger battery-capacities, diesel or petrol back-up generators and electrical conversion to 230 V AC. Totally 11,4 MWp was installed in 2016, which is 366% more than the volume installed in 2015.

How much support does a PV system get?

PV is supported with 35% of the investment within an upper support-limit of 10 000 NOK, plus 1250 NOK per kWp for systems up to maximum 15 kWp.

Only private households are eligible for this support. Depending on the system-size and price, the support will typically be in the range 10% to 30%.

Customized portable solar solution off-grid project cost in Norway

Off-Grid Solar

Articles Telecom Off-grid solar energy solutions provide reliable and efficient power to support sites located in remote areas where grid access is not feasible, and the costs and/or environmental impacts associated with using a diesel ...
