

Data sheet sunnova solar reviews

Overview

How much does Sunnova energy cost?

Sunnova Energy does not provide pricing information on its website, based on our review. However, our team read online customer reviews on the BBB and Reddit and found that Sunnova customers typically pay between \$3 and \$3.50 per watt of installed capacity.

Does Sunnova sell solar power?

Sunnova is a home energy supplier that sells solar power and battery storage. Its offerings, which include roof replacements, are available in 18 states across the United States. The company also serves customers in Guam, Puerto Rico and Saipan.

What are the advantages of Sunnova energy?

The main advantages of Sunnova Energy include its 25-year protection plans, multiple payment options, wide equipment selection and large service territory. Sunnova offers protection plans for all its solar panel installations, and you can buy coverage for home solar systems installed by other providers.

Does Sunnova offer pricing information?

As with most solar panel installation companies, Sunnova doesn't offer pricing information. Since there is also limited information on what manufacturers the company uses for solar panels, it is hard to say how the cost per watt breaks down—and there is no price-match guarantee.

Does Sunnova install solar panels?

Unlike some other solar panel installation companies, Sunnova installs products from a variety of manufacturers and helps customers create the systems that are best for their needs. Further, Sunnova offers solar leases, loans or purchase power agreements (PPAs), which can help homeowners get

started with solar power with no money down.

Does Sunnova have a battery?

A total of 59% of 1,000 respondents reported having installed a battery along with their solar panels. Sunnova offers three home battery storage options: the Tesla Powerwall, Enphase Energy System and Generac PWRcell. The Tesla Powerwall is a popular home battery, chosen by 30% of our 1,000 survey respondents.
