Overview

Yes, multiple studies have confirmed that solar panels add a substantial amount to your home's value – sometimes by as much as £90,000 – though properties in certain locations benefit much more than others because they improve the energy efficiency the building.

Yes, multiple studies have confirmed that solar panels add a substantial amount to your home's value – sometimes by as much as £90,000 – though properties in certain locations benefit much more than others because they improve the energy efficiency the building.

This guide explores how solar panels can enhance the value and appeal of your home and help you elevate the selling price. Pro tip: Avoid upsells and confusing packages—choose a provider with a clear, fixed-price quote that won't change. Heatable, a Which?

-approved solar installer, offers.

Solar panels are a long-term investment, but they offer huge benefits, including increasing the value of your home. They can also cut your energy bills by up to £310 a year or more, depending on your system, as well as help fight climate change and reduce your reliance on the National Grid. What's.

These systems promise energy savings, lower bills, and greater sustainability, but one question still lingers, do solar panels add value to your house in the UK?

This blog dives into the numbers, the market opinions, and the homeowner realities. Whether you're considering solar panels for your.

Installing solar panels on your home makes no difference to how much it's worth, according to two thirds (67%) of estate agents. Just 8%of estate agents said they thought solar panels increased property value. But 17% said that solar panels decrease its value. The exclusive research for Which?

* was.

For a 2-3 bedroom house in the UK, installing solar panels can increase the property value by 6.2% to 6.8%. Solar panels increase the value of a house because of the increased demand for energy efficient houses that save on energy costs. Houses in the UK with solar panels sell faster than houses.

Do solar panels add value to your home is a common question asked by homeowners considering their renewable energy options. While experts say the answer is yes, does it mean you should always install them or are there situations when they may not be considered an asset?

Although research would. Will installing solar panels increase the value of my home?

Estate agents' feedback suggests that installing solar panels will not increase the value of your home when you come to sell it.

How much do solar panels cost in the UK?

According to the Land Registry, the average house price in the UK is £280,660, meaning solar panels can increase the price by anywhere between £2,525 (0.9%) and £5,613 (2%). Such figures show that installing a solar panel system can increase the sale price of your property by over half of the installation cost.

Are solar panels a good investment in the UK?

The UK public's trust in solar panels continues to grow, with 1,468,652 domestic and residential property installations as of February 2024. More homeowners are installing solar panels to generate free, clean, and renewable energy. It allows them to reduce their energy bills, gain independence from the grid, and reduce carbon footprints.

Do solar panels devalue a home?

The good news is, as well as solar panels making your home more likely to make it onto a buyer's wish list, there is also a financial uplift. Research on the subject returns a variety of different numbers, but it's clear that when it comes to myths about solar panels, it's no longer true that solar panels devalue a property.

Are solar panels worth it?

This is of value to whomever lives at the property - be this you, or new

owners. "As soon as your solar panels are installed, you'll be able to reap the benefits either by using the electricity generated in your home (and therefore saving on bills), or selling the electricity back to the grid for a profit," says an Octopus Energy expert.

Can solar panels help you sell your home?

What's more, the cost of solar panels is falling. In fact, according to the latest data from the MCS Dashboard, they are £7,410 on average, as of June 2025. Research suggests they won't impact your ability to sell your home, and could, in fact, help you sell it.
