

Does installing solar panels save money

Overview

Can a solar system save you money?

Switching to solar can reduce your monthly electric bill. How much you might save depends on how much power you use, the size of your system, if you buy or rent the solar panels, how much sun your roof gets and your local electricity rates. With net metering, for example, the extra electricity your solar panels generate goes back to the power grid.

Can solar panels save you money?

Solar panels slowly lose efficiency over time, which is why they're typically sold with guarantees for at least 20 years of significant energy generation. In short, solar panels can, in fact, save you money. How much you save usually depends on the size of your solar panel system and the amount you spend on utility electricity.

Are solar panels a good idea?

Spoiler: They'd need to be quite high. By installing a solar panel system, you'll save on electric bills and reduce your carbon emissions. And if you have access to great incentives, like net metering or local rebates, or if you spend a lot on electricity, your savings will be high.

Should you install a solar panel system?

By installing a solar panel system, you'll save on electric bills and reduce your carbon emissions. And if you have access to great incentives, like net metering or local rebates, or if you spend a lot on electricity, your savings will be high. We're talking upwards of \$100,000 over 25 years in some cases.

Do more solar panels cost more?

Generally speaking, a bigger system with more panels will have a higher average cost than a system with fewer panels. While cheaper solar panels may seem like the easiest way to save money on a solar system, investing in

high-quality equipment usually yields greater long-term savings.

Do solar panels pay for themselves?

For example, if your system costs \$16,000 after incentives and saves you \$2,000 per year on electricity bills, your solar panels will “pay for themselves” in eight years. Assuming your solar panels produce energy at roughly the same rate over 25 years, you’d net \$34,000 in savings over the long term.
