

Easy way to clean solar panels

Overview

Do solar panels need cleaning?

There are some instances where solar panels might need cleaning, but most of the evidence says solar panels are self-sufficient and low-maintenance. We'll get to the best way to clean your solar panels in a minute.

How to clean solar panels?

The best way to clean solar panels starts with a gentle brushing. Otherwise, if a lot of material is sitting on solar panels, immediately mixing the debris with water might cause spread and smear. Brushing breaks down and removes some material, making the next steps in the cleaning process more effective.

How do you clean a solar panel if it rains?

Leaves, bird droppings, and dust accumulate on solar panels. Even though rain clears some of this, it doesn't get everything and can create dirty residue when puddles evaporate. Debris can be removed with gentle brushing from a soft-bristled tool to start the cleaning process.

How much can you save by cleaning your solar panels?

Not cleaning your solar panels can lower your solar savings by \$79 per year, on average. Companies typically charge \$5 to \$15 per panel for solar panel cleaning services. You can clean solar panels yourself in a few simple steps or seek out a cleaning company that can do it for you.

What is the cost of solar panel cleaning?

The cost of solar panel cleaning services typically ranges from \$5 to \$15 per panel. Not cleaning your solar panels can lower your solar savings by \$79 per year, on average. You can clean solar panels yourself or hire a cleaning company to do it for you.

What should you focus on when cleaning solar panels?

When cleaning your solar panel system, wiping down the surface of the panels will do. You do not need to worry about the wiring underneath them.
