

Eu market outlook for solar power 2025

Overview

SolarPower Europe's new mid-year market analysis for EU solar forecasts -1.4% annual growth for 2025. This would mark the first year of negative market growth since 2015, putting the continent's 2030 targets at risk.

SolarPower Europe's new mid-year market analysis for EU solar forecasts -1.4% annual growth for 2025. This would mark the first year of negative market growth since 2015, putting the continent's 2030 targets at risk.

The EU Market Outlook for Solar Power: 2025 Mid-Year analysis is the first of our reports of its kind. The publication provides a brief market snapshot and outlook for the rest of the year. As solar has become a major pillar of the EU energy transition, it's important to continuously feel the pulse.

SolarPower Europe's new mid-year market analysis for EU solar forecasts -1.4% annual growth for 2025. This would mark the first year of negative market growth since 2015, putting the continent's 2030 targets at risk. Despite forecasted negative growth, years of solar boom mean that the EU will meet.

Global Market Outlook for Solar Power 2025-2029 provides an in-depth forecast and analysis of the global solar power sector, with a special focus on India's rapid growth and emerging role as the world's third-largest solar market. The report explores trends and forecasts across residential.

outlook for the rest of the year. Our comprehensive outlook with five-year forecasts and policy insights will continue, supplying 22% of the power mix. While the EU remains on track to meet its 2025 solar target of 320 GW (400 GW DC), this achievement as the solar market stagnated in 2024. As it looks now.

By 2024, the global solar capacity is expected to reach 597 gigawatts, with new installations comprising 81% of this capacity. The electricity generated by solar power is anticipated to exceed all other forms of energy generation. By 2025, the forecast for global solar capacity is projected to. Will the EU solar PV market grow in 2025?

The new mid-year solar PV EU market analysis from SolarPower Europe reveals that for 2025, the annual market is expected to contract for the first time since 2015, with a projected -1.4% growth in the most likely scenario. This follows the exceptional annual market expansions in 2022 (+ 47%) and 2023 (+51%), and flattened growth in 2024 (+3.3%).

How much solar will the EU install in 2025?

In 2025, on current predictions, the EU is set to install 64.2 GW, a decrease from 65.1 GW in 2024. The new installations do help to deliver the European Commission's 2025 solar target of 400 GW – by the end of the year the bloc should host 402 GW.

What is the global market outlook for solar power?

SolarPower Europe's annual award-winning Global Market Outlook for Solar Power is the most authoritative market analysis report for the global solar power sector. The EU Market Outlook for Solar Power 2022-2026 contains an updated forecast for the EU solar market in 2022 and projections of the evolution of the market through 2026.

What will the solar industry look like in 2025?

This report outlines significant trends and projections for the solar industry. On May 14, 2025, SolarPower Europe published its latest report, '2025-2029 Solar Market Outlook', which highlights the following key insights: By 2024, the global solar capacity is expected to reach 597 gigawatts, with new installations comprising 81% of this capacity.

Will the EU meet the Repower EU 2025 solar target?

This would mark the first year of negative market growth since 2015, putting the continent's 2030 targets at risk. Despite forecasted negative growth, years of solar boom mean that the EU will meet the RePower EU 2025 solar target of 400 GW* – by the end of the year the bloc should host 402 GW.

What is the EU solar jobs report 2023?

The EU Solar Jobs Report 2023 contains an updated forecast for the EU solar job market in 2023, and projections of the evolution of the EU solar workforce until 2027. The EU Market Outlook for Solar Power 2023-2027 contains an updated forecast for the EU solar market in 2023 and projections of the evolution of the market through 2027.
