

# **Flexx 100 solar system**

## Overview

---

What is a flex 100i solar panel?

The Flex 100i is a flexible monocrystalline solar panel designed for versatility. It works on flat and curved surfaces so you can mount it on vans, RVs, and overland vehicles for renewable power off the grid, wherever you go. IP67 waterproof rating. Requires MC4 Solar to HPP Adapter Cable (98014) to plug directly into a Yeti. Sold Separately.

Can Flexx 100 solar panels withstand weight?

The Flexx 100 solar panels will crack easily under weight unless they are on a completely flat surface. The rigid frame solar panels can take my weight, making them more durable for certain applications like being placed on the roof of an RV.

Are rigid frame solar panels better than Flexx 100 solar panels?

When it comes to durability, rigid frame solar panels are more robust than Flexx 100 panels. The rigid frame panels can withstand more weight and are less likely to crack, making them a better choice for applications like RV roofs where they might be subjected to more stress.

Is flex 100i waterproof?

The Flex 100i can stand up to the elements and extreme temperatures. It has an IP67 waterproof rating, so you don't have to worry about it in the rain or snow. The Flex 100i weighs less than 5 pounds and is 63% lighter than our rigid 100 W Boulder 100i panel.

Is flex 100i better than Boulder 100i?

It is also extremely thin (0.09 inches)—in fact it's 92% thinner than the Boulder 100i (with the exception of the junction box, which is still less than 1 inch thick). The Flex 100i has an industry-leading efficiency rating for optimal energy collection, conversion, and retention.
