

Flower solar panel system

Overview

The SmartFlower panels are a combination of solar panels and advanced technology. Just like a real flower, these panels open up their petals when the sun rises. The panels angle their petals towards the sun at 90 degrees and start producing electricity.

The SmartFlower panels are a combination of solar panels and advanced technology. Just like a real flower, these panels open up their petals when the sun rises. The panels angle their petals towards the sun at 90 degrees and start producing electricity.

SmartFlower is the innovative sculptural solar flower with advanced photovoltaic solar panels that open and close to cleaning itself for maximum efficiency.

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop.

The Smart Flower solar system is an innovative and aesthetically pleasing solar solution that stands out in the crowded renewable energy market. Combining functionality with art, the Smart Flower mimics the motion of a sunflower, unfolding its solar panels at sunrise and tracking the sun throughout.

In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product. Part energy system and part industrial art installation, it's essentially a huge flower constructed of custom solar modules that open its "petals" and autonomously track the sun all day long.

The Smartflower, or Solar Sunflower, is a blend between solar panels and art. It is a photovoltaic (PV) system that has been incorporated to bring visibility to solar technology, and at the same time to enhance the landscape and architecture they complement via aesthetics. Smartflowers have been.

Flower Solar is known for its stunning Smartflower system. This ingenious solar system is ground-mounted and packed with smart features. For one, this flower's petals fold together and unfold whenever the Sun is out. On the underside of each petal, there are small brushes. When the petals fold in.
