If you're new to Good Energy, you'll need to switch to us first. Smart tariff for customers with a smart meter that sends half hourly readings.

What are the savings from installing solar panels?

Solar savings refer to the amount of money you would have spent on your electric bill had you not installed solar panels. When we talk about solar savings, we are discussing the avoided energy costs.

How much energy can you save a year?

With an estimate of \$1,600 each year in savings, you could easily save \$25,500 to \$33,000 on electricity during the life of your system—and that's if energy prices don't rise. Every household has different energy requirements, so your savings may end up being slightly different than the average estimate above.

Are solar panels a good choice for your home?

Household solar installations have become increasingly popular over the past several decades, as switching to solar energy can help the consumer reduce their carbon footprint and save on electric bills each month. But savings vary widely by location, product and many other variables.

How much do I earn if I export solar power?

Earn up to 25p/kWh* for the solar power you export. The more you export, the more you earn. How do I join?
