How much does the US government spend on solar?

The U.S. government is spending \$7 billion on solar for low-income homes. Solar energy can reduce climate pollution and electric bills. The U.S. government will soon start giving out \$7 billion in grants for solar programs for low-income homes.

Can solar help reduce energy bills?

Having solar that reduces energy bills means families put more money toward food, medicine and keeping air conditioning at a setting that's "livable," she says. Also, rooftop and community solar can help households avoid power shutoffs, which are dangerous in extreme heat and cold.

Are there grants & funding options for solar energy in 2025?

Luckily, the U.S. government has your back. Whether you're a low-income homeowner or a rural resident, there are plenty of grants and funding options in 2025 to make solar energy accessible, affordable, and efficient.

What is the \$7 billion solar for all program?

Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

What grants are available for solar panels?

1. Green Retrofit Solar Panel Grants Note: Funds must be used within 2 years of receiving them. 2. High Energy Cost Grants Extra tip: You must prove your area's average energy cost exceeds 275% of the national average. 3. Weatherization Assistance Program (WAP) 4. Low-Income Home Energy Assistance Program (LIHEAP).

Does Washington have a solar program?

Washington's proposal includes a program focused on single-family homeowners, a program that helps multifamily affordable housing properties access other state and federal solar incentives, and a program focused on Tribal solar deployment that will be co-designed with Tribal governments.
