

Government subsidy for collapsible solar container in Czech

Overview

The main objective of the programme is to improve the state of the environment by reducing the production of pollutant and greenhouse gas.

Applications are received by the State Environmental Fund of the Czech Republic before, during or after the completion of the project.

Depending on the real energy savings, you can save up to 50% of the total eligible expenses (up to 60% if combined with “boiler subsidies” for lower income households).

These systems are eligible for subsidies from the New Green Savings program, which has disbursed over CZK 2 billion in support for photovoltaic installations this year. What are containerized mobile foldable solar panels?

Containerized mobile foldable solar panels are an innovative solar power generation solution that combines the mobility of containers with the portability of foldable solar panels, providing flexible and efficient power support for a variety of application scenarios.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

How many beneficiaries benefited from the CZK program?

During the 2014-2021 programming period, 77,000 beneficiaries benefited from its support and were paid a total of 11 billion CZK.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in

Southern Europe it can even be up to 50 households due to the high solar radiation.

What is a solarfold photovoltaic container?

at full power. The solarfold Photovoltaic Container is mobile for universal deployment with a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into its operating position rapidly and smoothly along a length of around 123 metres.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?
