

Government subsidy for collapsible solar container in Finland

Overview

While Finland has made commendable progress in solar development, the government has recently decided to halt subsidies for solar projects. Backing will instead be allocated to hydrogen projects.

While Finland has made commendable progress in solar development, the government has recently decided to halt subsidies for solar projects. Backing will instead be allocated to hydrogen projects.

The aim of the subsidy scheme is to promote energy investment and energy infrastructure projects that are in line with the Sustainable Growth Programme for Finland and that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target. The scheme also aims to.

In Finland, the state offers various forms of support for the installation of solar panels. These subsidies are mainly administered by the Energy Agency and may vary annually according to the budget and political decisions. Currently, significant forms of support are: Energy support: The Energy.

Investment projects eligible for investment credit for the production of energy from renewable sources and for the storage of energy concerning: storage of renewable hydrogen, biofuels, bioliquids, biogas, biomethane and biomass fuels when at least 75 per cent of the content stored is obtained.

Promotion of the use of renewable energy is part of the energy and climate policy that aims for sustainable energy production and consumption to curb climate change. In Finland, the Energy Authority is responsible for the implementation of the EU renewable energy policy and the national renewable.

On 28 June 2024, the Finnish government published key details of a planned tax subsidy for large industrial investments. The initiative seeks to accelerate investments in the green transition, with the government bill expected to be presented to the Parliament in October 2024. Finland is taking.

The self-consumption of smaller installations is exempt from grid charges and

electricity taxes, while municipalities and companies receive investment subsidies. According to Auvinen, prices for larger grid-connected solar generators of more than one megawatt fell below 1,000 euros per kilowatt.
