# **Government subsidy for collapsible solar panel container in Tunisia**

## Overview

---

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

Implemented by ANME and GIZ, the programme is co-financed by the Mitigation Action Facility and the Government of Tunisia, in close collaboration with Attijari Bank, as well as STEG. By providing financial incentives for middle-income households to install PV systems, the programme aims to increase.

The UNDP-implemented, GEF-financed project “NAMA Support to the Tunisian Solar Plan” intends to provide direct assistance to two first-of-their-kind renewable energy projects: a 24MW wind farm at Gabes, funded by a domestic private-sector investor; and a 10MW solar PV plant at Tozeur, publicly.

The Tunisian Solar Plan (TSP) is Tunisia's official long-term plan for renewable energy. The TSP sets out Tunisia's ambition to harness its renewable energy resources in order to advance Tunisia's sustainable development. It includes specific 2030 targets for investment in wind energy, solar.

## Government subsidy for collapsible solar panel container in Tunisia

### Solar Energy in Tunisia , EcoMENA

Tunisia has very good solar radiation potential which ranges from 1800 kWh/m<sup>2</sup> per year in the North to 2600kWh/m<sup>2</sup> per year in the South. Tunisia has 1,800MW of solar energy potential which is until now yet to be harnessed.
