## Overview

---

Portugal has awarded grant support to around 500MW of battery energy storage system (BESS) projects, using EU Recovery and Resilience Plan (RRP) funding, a bloc-wide scheme that has supported energy storage across the continent.

Portugal has awarded grant support to around 500MW of battery energy storage system (BESS) projects, using EU Recovery and Resilience Plan (RRP) funding, a bloc-wide scheme that has supported energy storage across the continent.

Two solar-plus-storage projects are among five planned renewable energy sites whose details have been published for public consultation on the Portuguese Environment Agency's Participa portal. Lisbon-based Endesa subsidiary Newcon40 Unipessoal Lda is developing the Sol de Évora Photovoltaic Solar.

Portugal has selected 43 winning BESS projects for a share of €100 million (US\$105 million) in EU grants while, on the other side of Europe, Moldova has launched a 75MW BESS procurement with funding from USAID. Portugal has awarded grant support to around 500MW of battery energy storage system.

Indeed, Alqueva's pumped hydro storage project is one of the largest in Western Europe with a combined capacity of over 520 MW, which had an increase in its capacity since 2012. A pilot project - Storage InovGrid - was launched by EDP and Siemens in January 2016, in which lithium-ion battery.

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva According to the provisional results, unveiled last week, 43.

Portugal's Ministry of Energy has allocated €100 million to support 43 energy storage projects, scheduled for completion by the end of 2025. These projects were selected from 79 applications under the country's Recovery and Resilience Plan (RRP), with eligible projects able to receive up to €30.

The European Commission has approved a €350 million Portuguese scheme to support investments for the production of equipment necessary to foster the transition towards a net-zero economy, in line with the Green Deal Industrial Plan. The scheme was approved under the State aid Temporary Crisis and. Is there a general framework for energy storage in Portugal?

In spite of foreseeing some innovative projects for energy storage in Portugal, there is not yet a general framework in this field.

Does greenvolt have a Bess project in Portugal?

Greenvolt and Galp have both deployed 5MW BESS projects in Portugal in the past. In eastern Europe, Moldova is in the process of completing a bidding process for the procurement of a 75MW BESS and 22MW internal combustion engine (ICE) project, called the Moldova Energy Security Project (MESA).

Is the Portuguese scheme in line with the temporary crisis and transition framework?

The Commission found that the Portuguese scheme is in line with the conditions set out in the Temporary Crisis and Transition Framework. In particular, the aid (i) will incentivise the production of relevant equipment for the transition towards a net-zero economy; and (ii) will be granted no later than 31 December 2025.
