Overview

Households and farmers in Greece will be able to access government subsidy for their solar and storage systems under the Ministry of Environment and Energy (YPEN) new €200 million Photovoltaics on the Roof program, with special bonus of 10% for people with disabilities (PWS), single.

Households and farmers in Greece will be able to access government subsidy for their solar and storage systems under the Ministry of Environment and Energy (YPEN) new €200 million Photovoltaics on the Roof program, with special bonus of 10% for people with disabilities (PWS), single.

You can apply for the program "on the roof" and receive a grant. You should already have a grid contract with Hellenic Electricity Distribution Network Operator excluding the connection of the photovoltaic plant. You will need: This translation is generated by eTranslation, the European.

Greece has launched a new subsidy program to encourage more households and farmers to install solar projects and small storage systems. The €200 million (\$215.3 million) scheme is part of the country's post-pandemic recovery plan and will cover between 20% to 65% of PV system costs, depending on.

The Greek government is opening for submissions in April a new subsidy programme targeting the installment of small solar photovoltaic or pv (PV) systems and also batteries in the domestic as well as agricultural segments. With a budget of EUR 200 million (USD 217.5 m), the programme will enable.

Greece's Ministry of Environment and Energy has revealed a new €200 million (\$215.3 million) subsidy program for solar projects and small storage systems in the residential and agricultural segments. The scheme is backed by the country's post-pandemic recovery plan. From April, Greek households and.

Households and farmers in Greece will be able to access government subsidy for their solar and storage systems under the Ministry of Environment and Energy (YPEN) new €200 million Photovoltaics on the Roof program, with special bonus of 10% for people with disabilities (PWS), single parents and. How much does the new PV subsidy scheme cover?

The new scheme can cover between 20% to 65% of PV system costs, depending on the subsidy pot. For batteries, the first two subsidy pots will cover 100% of battery purchases and installation. The third and fourth subsidy pots will cover 90% of the battery costs.

How much money does the new PV subsidy pot cover?

Families with annual incomes higher than €40,000, or individuals with incomes higher than €20,000 will claim funds from a €50 million subsidy pot. In addition, the government has established a separate €30 million subsidy pot for farmers. The new scheme can cover between 20% to 65% of PV system costs, depending on the subsidy pot.

What is the PV subsidy plan & how does it work?

Under the plan, households will be able to seek funding to cover up to 75% of the costs needed to install PV panels at auxiliary building areas or mount them atop their dwellings, whereas farmers will receive support for up to 60%. The individual subsidy to be granted can be a maximum of EUR 16,000 for households and EUR 10,000 for farmers.

How much grid space is available for small PV systems?

The 2 GW of grid space is available for small PV systems up to 10 kW in size, and will be offered on a first-come, first-served basis. About 40% of this will be offered to residential net-metering systems, while 30% of it will be given to small commercial PV systems. The remaining 30% will be allocated to agricultural PV projects.
